# PIPE CONVEYOR BELTS

**An ISO 9001:2015 Certified Company**

**Pipe conveying system** is recently developed system and has several advantages over traditional conveyor system.

Recent time, it is more popular as it prevents environment pollution.

Its application is versatile to carry all type coarse material in all kinds of industry.

Advantages of pipe conveyor over conventional conveyor are

- A flat belt turns in to a shape of pipe and carries material.
- Pipe shape gives protection to material being handled against weather such as wind and rain.
- Reduction in transfer points.
- Compact design results in to space saving, works in any terrain, permits steep inclination angle and sharp bend.

# KRISHNA BELTS PVT. LTD.

**An ISO 9001:2015 Certified Company**

I respect my customer, stakeholder & environment.

Pipe conveyor belts are made with specially designed fabric and bottom cover with less rolling resistance with idlers.

Krishna offers pipe conveyor belts in different cover grades

- M 24
- Super abrasion resistance
- UHR
- Oil + FR
- Heat Resistance
- Oil / chemical resistance for fertilizer industries

I respect my customer, stakeholder & environment.
